

Uses of EUROMOD, 2020

Jack Kneeshaw

ISER, University of Essex

EUROMOD Annual Meeting – 2020

21 September 2020

Main story

- Broad trends continuing: more users, more publications, more citations, more website traffic
- Continued growth in users outside academia
- But notable quirks to report – mostly explicable

Access to the model

Completed access requests, by user type

Note: Numbers are completed/delivered requests. I2.0+ requests still counting.

'Academia' = universities, research institutes; 'Government' = ministries, parliaments;

'Other' = policy institutes, international organisations, central banks, think-tanks.

What's happened with I2.0+?

- I1.0+ = 253 completed accesses; I2.0+ = 129 ...
- Why?
 - I2.0+ numbers will rise over Sep-Dec (but not by 100+)
 - of greater significance, I2.0+ released later (by 1.5 months); in fact, same number of access requests received in 6 months from Feb 2019 and Feb 2020
 - UK users substantially down > UKMOD
- Implications
 - accesses for I3.0+ release in Dec 2020 will likely 'split the difference' – c.200 a good target?
 - potential loss of UK users interested in UK only (UK government/policy users); academic users remain

Publications and citations

Publications

Note: Based on EUROMOD publications database (partial count). Aside from non-notifiers, what we know is missing = CRs (EUROMOD and European Semester). 'Other' = mainly other working papers and reports (but also books, book chapters, media). 2020 still to finish!

Publications

EUROMOD Working Paper Series EM17/19-1

Working Paper Submission

Submissions to EUROMOD working paper series

The aim of the working paper series is to provide a comprehensive collection of research, which makes use of EUROMOD or its spin-off models (e.g. SOUTHMOD).

Editorial policy

- We welcome academic and policy-oriented analyses.
- We expect full-length research articles (typically 8-12 thousand words, with no upper word limit).
- Papers must be written in English. Works in other languages are only considered on an exceptional basis.
- Corrections and revisions to published papers in our series (e.g. addendums) are only considered on an exceptional basis. For regular updates on specific analyses, we recommend alternative forms of publications (e.g. annexes to Country Reports, blog).
- The manuscripts are not peer-reviewed. The editor will only check that the content is generally suitable for the series and may additionally make suggestions regarding the clarity of the paper.

The current editor of the series is [Dr Alari Paulus](#).

EUROMOD citations, by year of publication

Note: Source = Google Scholar, via Harzing PoP; keyword = EUROMOD; caveats = aplenty!

Website statistics

UNIQUE USERS, BY YEAR
