

EUROMOD software v3.7.8

What's new?

Compared to previous release v.3.7.6, this software version includes the following updates/changes:

- **Core software:**

- Allowed for uprating by multiple functions at one
- Allowed for constants to be used as a multiplier in Defills
- Allowed private components in Add-ons
- Allowed global Extensions in Add-ons
- The UI now allows adding multiple instances of “unique” parameters
- Fixed a minor bug in the Extension Switches form

- **Applications:**

- **EUROMOD Statistics:**

- Fixed In-depth Distributional payers/beneficiaries to not count missing (NaN) values
 - Fixed a bug related to duplicate entries of external Statistics
 - Improved the Macrovalidation and External Statistics speed

- **Connectors:**

- Advanced output manipulation
