

EUROMOD software v3.8.1

What's new?

Compared to previous release v.3.8.0, this software version includes the following updates/changes:

- **Core software:**

- Fixed an issue with Literal Constant replacements and regional settings
- Fixed a bug that produced an error when the run condition of a Defill was evaluating to false
- Fixed a bug related to UnitLoop
- Fix to avoid throwing warnings during formula optimization (avoids division by zero warnings)
- Fixed a bug with the HICP form and regional settings

- **Connectors:**

- Bug fix with respect to finding a system when there is no exact match
