

EUROMOD software v3.8.3

What's new?

Compared to previous release v.3.8.1, this software version includes the following updates/changes:

- **Core software:**

- Updated the HHoT files
- Improvements in the Statistics Presenter (including a fix for tables 2.2.x in multi template)
- New Statistical templates for SOUTHMOD
- Fixed an issue with the F5 shortcut for DefConst/DefVar

- **Connectors:**

- Improvements in the Python connector
