

# EUROMOD J1.136+ beta

## *What's new?*

This EUROMOD release allows to replicate the tax-benefit **indicators based on EUROMOD-HHoT** used for the **European Semester and monitoring frameworks** (Country Reports, Joint Employment Report, EMCO/SPC benchmarking) and **EU Data Infrastructure** (DG ECFIN tax and benefits indicators database, Eurostat net earnings and tax wedge datasets).

With respect to the previous release (J1.86+), this one includes the following updates/changes:

### **POLICIES AND FUNTIONALITIES**

- Specific improvements to the functioning of the extensions **HHoT – unemployment benefits** and **HHot – monthly unemployment benefits**.
- **Bug fixes and improvements** in all country models.

### **DATA**

- **No new datasets**
