

EUROMOD 16.0+

What's new?

Compared to the previous release (15.99+ beta), this one includes the following updates/changes:

POLICIES AND FUNTIONALITIES

- **Updated 2023 policy systems** for all countries.
- **Updated uprating indices** and **external statistics for 2023**, and updates/corrections for previous years.
- **Updated exchange rates**, including figures for the UK for compatibility with UKMOD.
- **Add-ons:**
 - **LMA:** transition parameters for 2020 and 2021 in the TransLMA.cc policy are now conditional on the use of pre-COVID input data.
 - **NRR:** ils_sicot added to the NRR/PTR decomposition.
- **Bug fixes and improvements** in all country models.

DATA

- **2021 input data** for 25 countries (all except PL and SK). Due to the heterogeneous influence of the COVID pandemic during the income year (2020), the allocation as best match is country-specific. Therefore, the 2021 dataset is not necessarily the best match for the most recent systems.
