

EUROMOD software v3.6.16

What's new?

Compared to previous release v.3.6.8, this software version includes the following updates/changes:

- **Core software:**

- Improved error-checking for loop functions
- Added a condition for system year in the ChangeParam function
- Added the options to "Set all N/A to X" and "set all X th N/A" in the Databases form context menu
- Added four new Placeholders: =sysyear=, =data=, =datayear=, =datacoicop=
- In the "Define Content" form, added checkboxes to select all Countries, Add-ons, Global files
- DefTU: the "Default" value is now used by default for the dependent child condition

- **Applications:**

- **EUROMOD Statistics:**
 - Improved Excel export to properly show N/A and NaN values
 - Statistics Presenter now uses a new browser engine
- **External statistics:**
 - Will now read all relevant incomelists, even if they are set to "off"
- **Hypothetical Household Tool (HHoT)**
 - Added new HHoT files

- **Connectors:**

- Includes a beta release of the new STATA connector
