

EUROMOD software v3.4.3

What's new?

This software version includes the following updates/changes:

- **Core software:**

- Changes requested by the Commission Intellectual Property Service (Changes in the EUROMOD icon, license agreement added to the Help and Info menu and to the installation folder, notice files added to the installation folder).
- Fixed bug in the merge tool when several extensions were applied to the same function/policy/parameter.
- Improvements on how the application exceptions are handled.
- Suspended users do not appear anymore in Version Control
- Fixed bug that prevented projects to load properly if a removed user had contributed to that project.
- Fixed bug that prevented files from a certain size to be uploaded to the Version control fixed.
- Minor improvement to update URLs; Minor change to fix a broken link.
- Allowed the BackEnd to work as either self-hosted or inside another server.
- Improved BackEnd error-handling.
- Enforced "home.html" as the default page.
- Updated the Statistics engine library.
- Minor visual improvement in the statistics "back" button (to make it cross-browser).
- Fix for encoding bug in EM_Statistics.

- **Plugins:**

- **In-depth Analysis:**
 - Minor adjustments to the In-depth Analysis plugin (About area modified, font size in the text fields increased).
