

# EUROMOD software v3.6.13

## *What's new?*

Compared to previous release v.3.6.8, this software version includes the following updates/changes:

- **Core software:**
  - Improved error-checking for loop functions.
  - Added a condition for system year in the ChangeParam function.
  - Added the options to "Set all N/A to X" and "set all X th N/A" in the Databases form context menu.
- **Applications:**
  - **EUROMOD Statistics:**
    - Improved Excel export to properly show N/A and NaN values.
  - **External statistics:**
    - Will now read all relevant incomelists, even if they are set to "off".
- **Connectors:**
  - First public beta release of the new STATA connector.
