

EUROMOD software v3.6.8

What's new?

Compared to the previous release v3.6.2, this software version includes the following updates/changes:

- **Installer**
 - Fixes a problem that required the user to manually uninstall previous versions before installing the new one.
- **Core software**
 - **New warnings:**
 - When TUs include DepChildren or OwnDepChildren, but do not contain a DepChild definition
 - When factor conditions are used and not all possible conditions are covered
 - **Added a check** for project paths that are too long
 - **Bug fixing**
- **Applications**
 - **Policy Effects Tool (PET)**
 - Advanced version publicly released: when the tool is launched, the user can choose between Basic and Advanced
 - **Hypothetical Household Tool (HHoT)**
 - Updated HHoT files
 - **EUROMOD Statistics**
 - Moved settings (such as the last path used) from permanent to session-based
 - Improved behaviour in In-depth analysis when changing project path
 - Improved sync of scrolling throughout the Statistics Presenter pages
 - Added percentage difference columns in Baseline/Reform in the Statistics Presenter
 - Minor adjustments in tables
- **Income list components** plugin publicly available. It produces summaries of the components of all income lists for all countries and systems.
